

Feature Highlights:

Full-duplex performance—simultaneous 2-way communication

Business quality conferencing anytime

Powerful speaker/3 sensitive mics—hear and be heard clearly

Easy to install/easy to use

Polycom® VoiceStation™ 100

Big sound in smaller rooms.

Designed to improve your business communications while increasing productivity, VoiceStation 100 enables you to conduct remote meetings that are as natural as speaking face-to-face.

Business quality

If you work in a small to medium-sized business, chances are that you are still using low-quality, handset speakerphones to conduct important business with co-workers, and even customers. Handset speakerphones are fine for listening to voicemail or conducting short conversations, but usually fail to maintain natural two-way communication necessary to maximize productivity and conduct effective business meetings.

Conduct remote meetings...

Polycom's full-duplex audioconferencing systems are found in more conference rooms, boardrooms, and other meeting areas than all other types of audioconferencing systems combined. Now there's a perfect solution for offices and other smaller meeting areas. VoiceStation 100 by Polycom.

What is full-duplex?

Full-duplex is the ability to communicate in 2 directions simultaneously so that more than one person can speak at a time. Half-duplex means that only one person can talk at a time, which is unnatural in normal free-flowing 2-way communications, like conference calls. VoiceStation 100's crystal-clear, full-duplex audio allows you to speak in 2 directions at the same time—as naturally as speaking face-to-face!

...as natural as being there!

Hear and be heard clearly

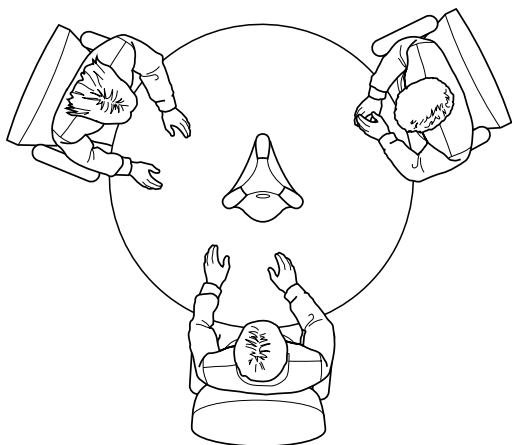

VoiceStation 100 is the clear alternative to handset speakerphones when conducting remote meetings. With Polycom's full-duplex Acoustic Clarity Technology™, VoiceStation 100 enables natural, free-flowing conversation, assuring that everyone can hear and be heard clearly without the need to raise your voice or repeat words and phrases.

Polycom VoiceStation 100

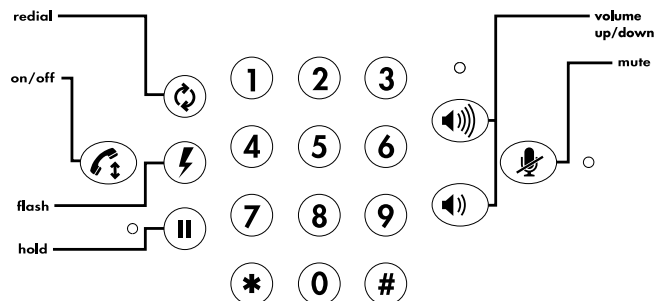

Conference Areas

VoiceStation 100 is ideal for offices and small conference rooms, accommodating 4 or fewer meeting participants.
